Full-Stack Developer | MERN Stack | Next.js 15 | TypeScript |

Cloud Deployment

PROFESSIONAL SUMMARY

Performance-driven IT Engineering student and full-stack developer specializing in the MERN stack, real-time databases, and user-centric UI/UX design. A highly collaborative problem-solver who thrives under pressure, translating complex requirements into high-quality, production-ready software on strict deadlines.

PROJECTS

RAJ CHEMIST – *AI-Powered Attendance & Payroll System* 02/2026 – 05/2026 | Ahmedabad

- Developed a production-ready, full-stack AI attendance platform integrating cross-platform live-camera facial recognition powered by DeepFace (FaceNet), OpenCV, and anti-spoofing algorithms.
- Programmed a high-precision Geo-fencing API combined with a custom progressive 4-punch tracking logic to mathematically restrict and automate clock-ins based on real-time hardware locations.
- Engineered a scalable payroll engine that programmatically calculates shift tiers, precise overtime coefficients, and late fee deductions.
- Constructed an interactive administrative analytics dashboard equipped with asynchronous Excel and PDF report data-exports using Next.js, Node.js, and PostgreSQL.
- Containerized the application services utilizing Docker and optimized cloud storage pipelines by mapping static assets directly to AWS S3 buckets.

MYP Electrical Solutions – *Web Developer & System Designer* 09/2025 – 02/2026 | New Zealand

- Developed and deployed custom backend modules designed to automate highly repetitive, complex administrative workflows within public sector software architectures.
- Optimized data-processing logic and transaction frameworks, significantly decreasing server-side execution delays and accelerating high-volume data handling.
- Refactored core platform navigational layouts using user-centric UI/UX design methodologies, reducing operational friction for government officials.
- Audited and enhanced platform features to strictly comply with cross-departmental security governance and government compliance standards, ensuring complete data integrity.

New Zealand Government Workflow Optimization – *Software Optimization* 07/2025 – 09/2025 | New Zealand

- Engineered a custom business web platform and responsive architecture using React.js and modern CSS, improving digital conversion rates and brand visibility.
- Designed and integrated strategic contact forms and lead generation modules that captured active user inquiries seamlessly.
- Architected a centralized Inventory Management System (IMS) featuring real-time stock tracking for electrical components, reducing manual logging errors by eliminating paper dependencies.
- Implemented automated operational alerts for low-stock thresholds, accelerating the hardware procurement workflow for remote field technicians.
- Formulated an industry-specific social media strategy and consistent visual branding identity to bridge internal operational metrics with external commercial visibility.

EDUCATION

Bachelor of Engineering in Information Technology (BE-IT) 08/2023 – 06/2027 | Gandhinagar, Gujarat
LDRP-ITR – Gandhinagar, Gujarat

- Academic Performance: Maintained a cumulative 7.0 CGPA throughout academic terms.
- Core Engineering Disciplines: Relational Database Management Systems (RDBMS), Advanced Software Engineering Concepts, Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA).
- Technical Contributions: Active contributor to real-world academic projects focused on algorithmic problem solving in C++.

COURSES & CERTIFICATIONS

- NPTEL – Python
- Infosys – DSA with C++
- Full Stack Web Development Certification – Red & White Multimedia Education (Oct 2024 – June 2026)
- Second Prize Winner – Red & White Institute Innovation Hackathon
- Technical Certification – Advanced HTML5 & CSS3 Web Engineering

TECHNICAL & SOFT SKILLS

Frontend Technologies HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Web Design.	Backend & Databases Node.js, Express.js, FastAPI, RESTful APIs, MongoDB, MongoDB Atlas, PostgreSQL.	DevOps & Cloud Docker, Amazon Web Services (AWS S3), Git, GitHub version control.	Automation & Architecture N8N Workflow Automation, UI/UX Wireframing, System Prototyping.
Core Computing C++, Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA).	Cross-Functional Collaboration Proven ability to drive team synchronization, managing client-facing operations and projects.	Problem-Solving & Execution Designed security-compliant automated workflows and verification systems.	Deliverable Management Thrives in hackathons, successfully balancing strict industrial and academic deadlines.

LANGUAGES

English (Fluent) • Hindi (Fluent) • Gujarati (Native)
